EXPERIENCE

Senior Analyst/Senior Software Developer
Capgemini

📅 March 2022 – Ongoing   📍 Airoli, Navi Mumbai

- Certified Associate Reactive Developer and proficient in developing reactive web applications using OutSystems.
- Created custom modules, screens, and logic flows to meet project requirements.
- Integrated external systems and databases with OutSystems applications.
- Integrated external APIs and services into OutSystems applications, enhancing functionality and enabling seamless data exchange.
- Developed responsive user interfaces using HTML, CSS, and JavaScript.
- Good knowledge of SQL Server.
- Conducted thorough testing and debugging to ensure the reliability of OutSystems applications.
- Implemented best practices for quality assurance.
- Utilized OutSystems service center and lifetime tools for monitoring, troubleshooting, and managing application life-cycles efficiently.
- Good understanding of Software Development Life Cycle.

Project and Process Engineer
Piaggio Vehicles PVT. LTD.

📅 March 2021   📍 Baramati

- Managed various projects within the company with team members.
- Knowledgeable about shopping carts, purchase orders, RFQs, and process sheets.
- Facilitated end-to-end communication with suppliers and vendors.

Quality Job Inspector
SKF Bearings

📅 August 2019   📍 Pune

- Performed dimensional accuracy inspections on bearings, ensuring compliance with tight tolerance specifications using precision instruments.
- Conducted thorough surface finish inspections to identify defects, ensuring all bearings met high-quality standards before shipment.
- Monitored roundness and concentricity of bearing rings, contributing to improved product performance.

PROJECTS

0.1 Customer Relationship Management Application

- Created a comprehensive CRM system to manage customer information, track interactions, and streamline processes.
- Provided a centralized platform for customer-related activities, enhancing communication and collaboration within the organization.

0.2 Eneco Project

- Developed a project for Eneco, a leading producer and supplier of natural gas, electricity, and heat in the Netherlands.
- The project involved two key components:
  - UI development using the OutSystems platform.
  - Database integration with Oracle.
